PACKAGING SOLUTIONS

PRINTINGPACK

PACKAGING SOLUTIONS

- Manufacturers of primary and secondary packaging
- Single point of contact for your packaging needs
- Creative support for product development and communication
- Application of the HACCP method for primary packaging
- UNI EN ISO 9001:2015 - FSC certifications
- Flexible production for micro and macro productions

Technology and method at your service

Equipped with an **extremely flexible** structure, we adopt standards in line with the needs of the companies with the highest demands to provide high quality products.

The dynamism and versatility of our company allows us to offer **different packing solutions** and to act as a **single point of contact** to cut costs and guarantee a complete service. Quality plays a fundamental role: numerous controls and standardised procedures are carried out on all processes, such as the observation of specific in-line anti-fraying programmes for combined yields.

The processes are therefore scrupulously monitored from **graphic design** through printing to the finished product. At the same time, the recording of product-related information guarantees **continuity in quality** of all the subsequent reprints.

Customer care is also reflected in strict hygiene requirements; in particular, with regard to primary packaging, where the company has complied with current regulations such as a **HACCP Self-Control Plan**. Compliance is kept constant through the enhancement of collaboration, transparency and exchange of information along the entire supply chain.

The wide degree of **personalisation** and our creative approach to the solutions proposed to customers in terms of packaging, allow us to provide an exclusive product, differentiated from competitors and above all, made with **extreme attention to the environment** and the materials used.

PRIMARY PACK

- Envelope printing
- Aluminium retroblister printing

The procedures adopted for the production of materials and objects intended to come into contact with foodstuffs known as “MOCA” (primary packaging), follow the correct application of Good Manufacturing Practices (GMP) through a system of Quality Assurance, Quality Control and implementation of drafting and filing of operational documents, keeping complete traceability of the activities carried out.

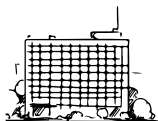

SECONDARY PACKS

- Cartons/boxes
- Leaflets
- Displays/Crowner
- Brochures and Catalogues
- Adhesive labels
- Take Away Packs
- Ennoblements

All our products can be made unique through the choice of media, graphic customisation or the application of ennoblements.
